Neighborhood Street Clearing Program

(updated 1/20/10)

The Police, Fire and Public Works Departments announce the start of a phased snow clearing program to facilitate emergency access throughout Sioux City. The clearing of snow from the street to the right of way will allow for timely response to residences and locations to set up once the public safety personnel are on site.

The City has been divided into 12 sections with some sections being cleared concurrently. Each section is expected to have two days of clearing with parking restricted to one side of the street for a 24 hour period (7AM to 7AM). During the two day period there will be no parking on the odd numbered address side of the street on the first day and parking will be allowed on the opposite side of the street. On the second day, parking will be restricted on the even side of the street and allowed on the (just cleared) odd side of the street. To ensure the street is cleared, vehicles must be moved during these times. The Police Department will work closely with Field Services throughout this effort and vehicles that are not in compliance will be towed.

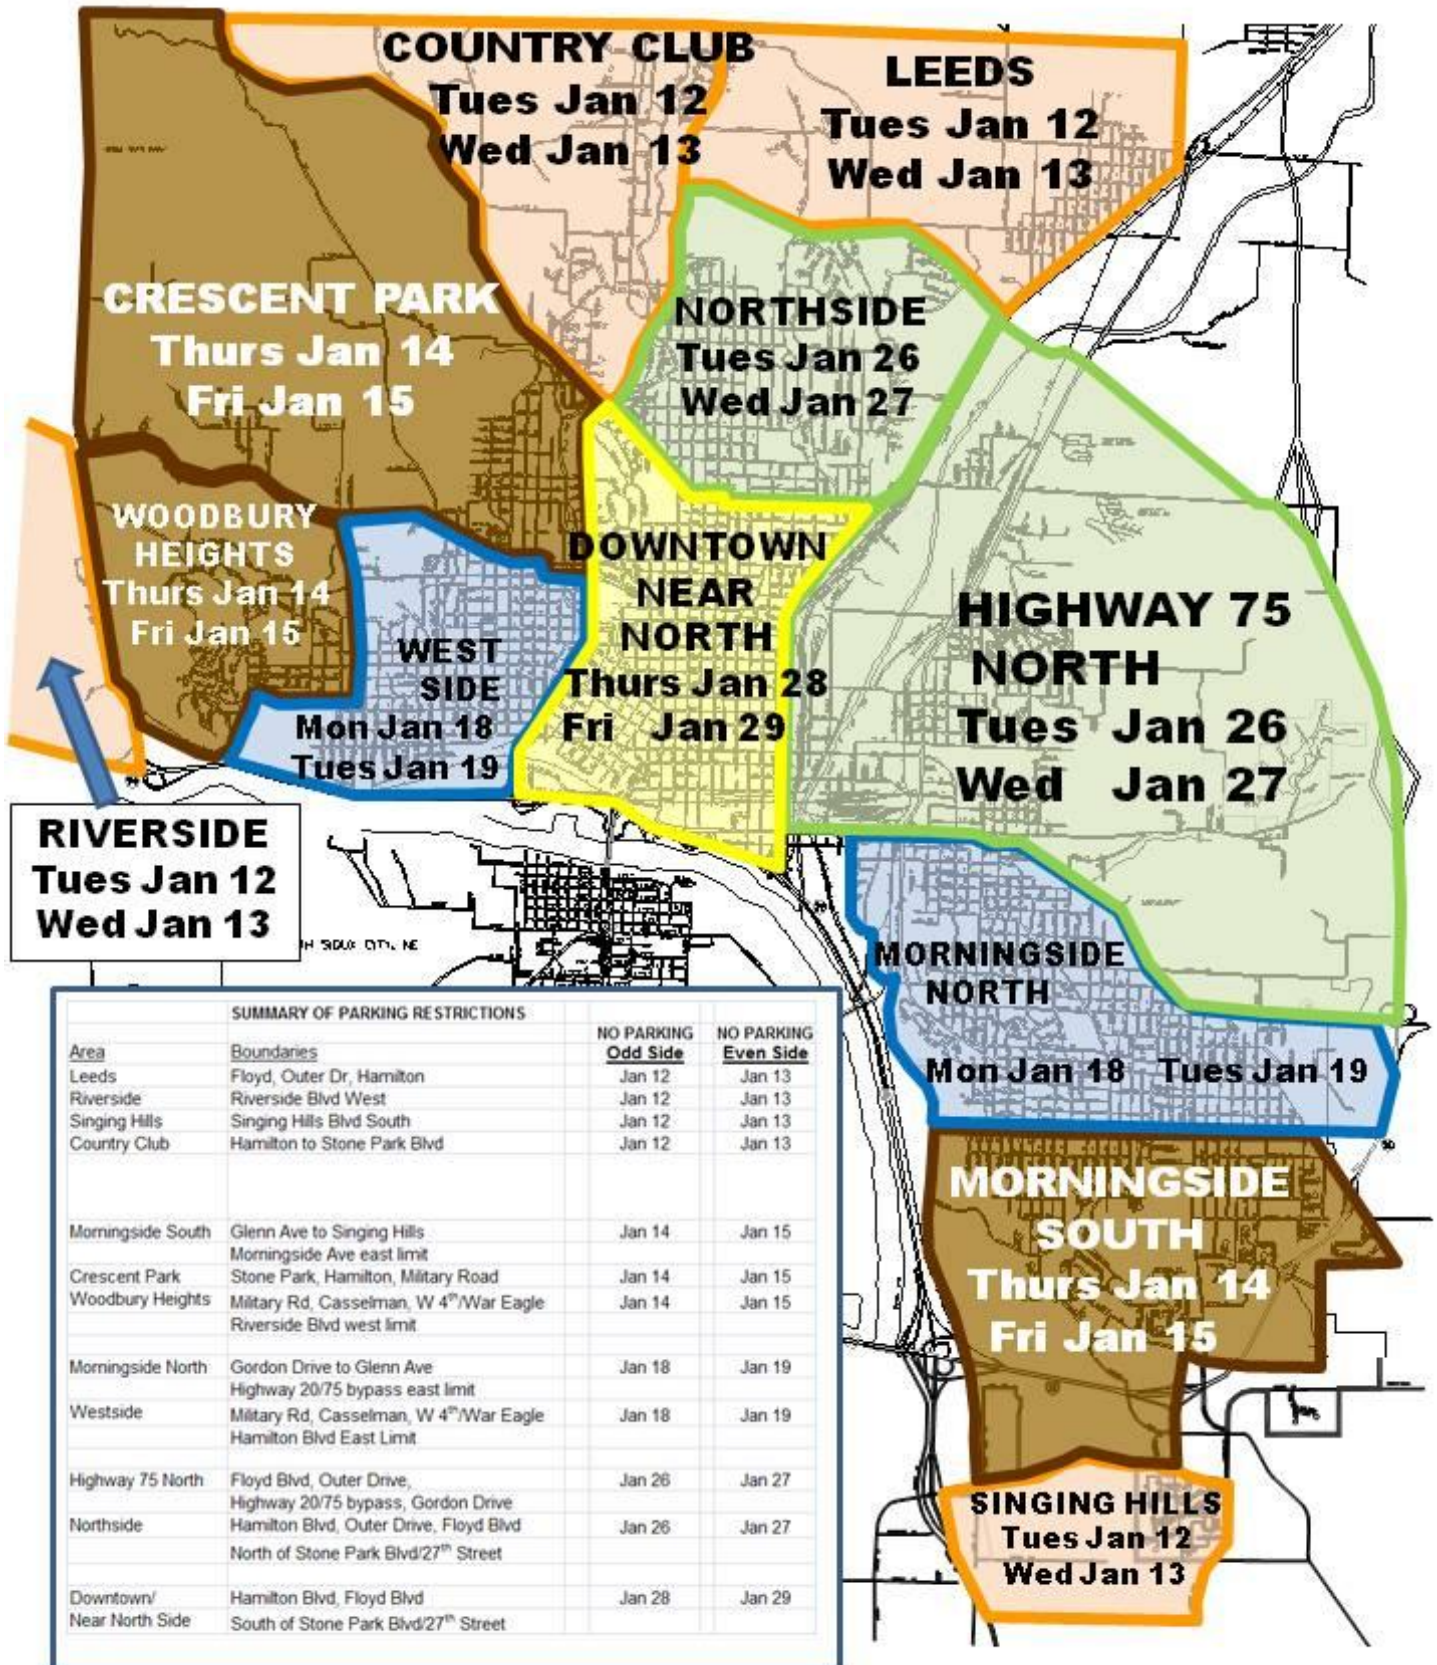

It is the responsibility of the property owner to remove snow from the sidewalk. Equipment operators are unable to clear snow from the driveways. When shoveling your driveway approach or sidewalk, move the snow to the parking area or your yard, but not the street. The City appreciates the citizens understanding in clearing these areas while the City crews are working to clear routes for emergency access.

If another snow event occurs, it will take precedence over this program and the clearing will be suspended while normal snow plowing operations are in effect. The progress of this program will be updated weekly with a review of the next weeks parking restrictions.

SUMMARY OF PARKING RESTRICTIONS

<u>Area</u>	<u>Boundaries</u>	<u>Odd Side Restriction</u>	<u>Even Side Restriction</u>
