

**CITY OF SIOUX CITY
FIELD SERVICES
DIVISION**

Address: _____

This notice has been left because the Sioux City Field Services Division has determined that your service line is leaking. This is a public nuisance that must be abated by you.

City code section 12.12.030 enacted in 1943 establishes that the property owner is responsible for the service line. This responsibility begins at the point of connection to the city water main and continues all the way into the house. Your leak is between the main/shut off and the shut off/meter.

You must engage the services of an approved plumber/utility contractor to make any needed repair or replacement. The actual repair work can not be done by the property owner.

You have until _____ a.m./p.m. on _____ to notify **279-6164 or 279-6150** of your intent to have a licensed plumber/utility contractor begin repairs.

Failure to have the work start by _____ will result in the City disconnecting your service line from the City's water system, at your expense. You may appeal this order by filing a written request with the undersigned but, such appeal shall not alter the time frames you have to effect repairs to your service line due to the emergency nature of the leakage.

The City will not repair the service line.

Your cooperation in satisfactorily correcting this leak would be greatly appreciated.

Tim Higgins
Underground Utility Services Field Supervisor

Brian Fahrendholz
Field Services Manager
