

# West 7th Street: Public Meeting

Date: Thursday, March 27, 2014  
Time: 4:00 p.m.  
Location: 3E (600 West 7th Street)  
Please enter from EAST SIDE of the Building  
Sioux City, IA 51103

West 7th Street, between Hamilton Boulevard and Wesley Parkway, will be reconstructed in summer 2015. The City of Sioux City has retained the services of a consultant team consisting of RDG / DGR to design this project.

## Consultant Visit / Street Reconstruction Project

The City's consultant team worked out of the Junior League building (316 west 7th Street) for a few days in February. At the end of those three days, a public meeting was held to go over the preliminary drawings. Since that time, the City has received several phone calls and e-mails in opposition to the concept plan presented at that meeting. As a result, we have gone back to **the "drawing board" and will present a new concept that we** believe addresses the concerns received. This concept plan will be presented at the meeting on March 27th (please see meeting information above).

## Façade Program

**A total of 27 façade improvement program applications were** received requesting assistance in the amount of \$823,060. Only \$300,000 is currently available. City staff scored the applications **received based on the criteria included in the façade** improvement application packet and will make a recommendation regarding funding to City Council. The City Council will review the recommended applications and officially approve the selected projects in early April.
