

## ***Preface***

The stage is set for growth!

Citizen input from public forums, small group discussions and one-on-one interviews throughout the City, combined with an in-depth analysis of existing data and trends, have yielded a comprehensive plan for future growth and development in Sioux City, Iowa.

This plan is divided into two parts. The first part addresses the future by identifying the desired vision for the community and outlining goals, strategies, recommendations and actions necessary to achieve the vision. The second part, a Technical Supplement, is a record of the data and information gathered throughout this planning process.

The Steering Committee, the Technical Resource Group, Task Force participants, special interest groups, and the public at-large all took the opportunity to make known their concerns and desires. Success in achieving this vision will depend on the community's dedication to the plan.
